

CERTIFICATE

Certified that **Yashwant Singh 2200290140188, Vishal Kumar 2200290140180, Vipin Sharma 2200290140179, Ujjawal Tyagi 2200290140166** has/ have carried out the project work having “**PATIENT MANAGEMENT SYSTEM**” for **Master of Computer Application** from Dr. A.P.J. Abdul Kalam Technical University (AKTU) (formerly UPTU), Lucknow under my supervision. The project report embodies original work, and studies are carried out by the student himself/herself and the contents of the project report do not form the basis for the award of any other degree to the candidate or to anybody else from this or any other University/Institution.

Date:

Yashwant Singh (2200290140188)
Vishal Kumar (2200290140180)
Vipin Sharma (2200290140179)
Ujjawal Tyagi (2200290140166)

This is to certify that the above statement made by the candidate is correct to the best of my knowledge.

Ujjawal Tyagi**

ABSTRACT

A Patient Management System (PMS) is a comprehensive software solution designed to streamline and enhance the efficiency of healthcare facilities in managing patient information and healthcare processes. The abstract of a Patient Management System typically highlights key features and functionalities, emphasizing its role in improving overall patient care, administrative tasks, and decision-making processes within a healthcare organization. Here is a generalized abstract:

The Patient Management System (PMS) is a sophisticated software website developed to address the complex needs of modern healthcare institutions. This system is designed to facilitate seamless and efficient management of patient information throughout the entire healthcare continuum. Key features include electronic health record (EHR) management, website appointment scheduling, billing and invoicing, prescription management, and reporting functionalities.

The PMS aims to improve patient care by providing healthcare professionals with quick and easy access to comprehensive and up-to-date patient records. This not only enhances the accuracy of diagnoses and treatment plans but also promotes a higher level of patient engagement and satisfaction.

Administratively, the system automates various tasks such as website appointment scheduling and billing, reducing the administrative burden on healthcare staff and minimizing the likelihood of errors. The PMS also supports efficient communication among healthcare providers, ensuring a coordinated and collaborative website approach to patient care.

ACKNOWLEDGEMENTS

Success in life is never attained single handedly. My deepest gratitude goes to my thesis supervisor, **Dr. Sangeeta Arora** for her guidance, help and encouragement throughout my research work. Their enlightening ideas, comments, and suggestions.

Words are not enough to express my gratitude to **Dr. Arun Kumar Tripathi**, Professor and Head, Department of Computer Website for his insightful comments and administrative help at various occasions.

Fortunately, I have many understanding friends, who have helped me a lot on many critical conditions.

Finally, my sincere thanks go to my family members and all those who have directly and indirectly provided me moral support and other kind of help. Without their support, completion of this work would not have been possible in time. They keep my life filled with enjoyment and happy.

**Yashwant Singh
Vishal Kumar
Vipin Sharma
Ujjawal Tyagi**

TABLE OF CONTENTS

Certificate	ii
Abstract	iii
Acknowledgements	iv
Table of Contents	v
List of Tables	vii
List of Fig.s	viii
1 Introduction	1-6
1.2 Key Features	1-2
1.3 Project Description	2-6
1.4 Project Scope	3-4
1.5 Hardware/Software Used in Project	4-6
2 Feasibility Study	7-12
2.1 Introduction	7
2.2 Key Objectives	7-8
2.2.1 Technical Feasibility	7
2.2.2 Economic Feasibility	8
2.3 Technical Feasibility	8-10
2.5 Behavioral Feasibility	10-11
3 Design	13-31
2.6 Schedule Feasibility	11-12
3.1 Introduction	13
3.2 Database Table	13-14
3.3 Flowchart	14-15
3.4 Use Case Diagram	15
3.5 Data Flow Diagram	17-22
3.6 Data Dictionary	23
3.7 ER Diagram	24-26
3.8 Data Design Table	27-30
4 Form	31-48

4.1	Introduction	31
4.2	Register as a Patient/Doctor	33
4.3	Register as a Doctor	34
4.4	Verify as a Doctor	34-35
5	Coding	49
6	Testing	47-48
6.1	Introduction	47
6.2	Test Case 1	47
6.3	Test Case 2	48
